

Additional test reports on the type plate!

Since October 2004 BPW type plates have had an **expanded test report line**. This line now **not only** contains the **standard test report** but also any **special test reports for other test loads**. **Up to 3 test reports are possible depending on the wheel brake**. The change ensures that no customer-specific type plates have to be made for an axle part number.

The brake test report specified on the type plate can be called up as before on the BPW website at www.bpw.de (Download Centre - Test Reports). The test report used in the brake calculation is the determining factor in the vehicle registration!

Self-adhesive type plate up to week 9/2004	Self-adhesive type plate from week 10/2004
